DETAILED ACTION

Reasons of Allowance

1. The following is an examiner's statement of reasons for allowance: claims 17, 21-29, and 31-36 are allowable over the prior art of record for the reasons as stated in the Applicant's amendment filed on April 3, 2006 pages 2 – 6.
2. In this case, the prior art teaches in accordance with XM radio's unique scheme, the LOS signal transmitted from satellite are received, reformatted to Mult-Carrier Modulation and rebroadcast by non-line-of-sight terrestrial repeaters, and the assigned bandwidth is partitioned into two equal ensembles or program groups, each ensemble will be transmitted by each satellite on a separate radio frequency carrier, each RF carrier supports up to 50 channels of music or data in TDM format, and with terrestrial repeaters transmitting an A and a B signal, six total slots are provided, each slot being centered at a different RF carrier frequency, and the use of two ensembles also allows for the implementation of a novel frequency plan which affords improved isolation between the satellite signals and the terrestrial signal when the receiver is located near the terrestrial repeater.

None of the prior art of record teaches or fairly suggests that a satellite digital audio radio multipoint distribution system comprises a terrestrial repeater connected to the antenna for decoding the satellite signal and recoding the signal into an XM radio terrestrial intermediate frequency (IF) multicarrier modulated satellite radio terrestrial broadcast format signal, the repeater including a receiver and demodulator for

downconverting the satellite digital audio radio signal to TDM bitstream, a de-interleaver and reformatter for re-ordering the TDM bitstream for a terrestrial waveform, a terrestrial waveform modulator coupled to the de-interleaver and reformatter, and for recoding the output of the modulator to an IF frequency, and a system for distributing the recoded IF signal, and plural satellite digital audio radio service receivers adapted to receive the recoded IF signal, and together with combination of other element as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
